What is Water Wonders?

Water Wonders Company was established with 10 years background in aquatic field in Dubai in 2001. We are now proud to have created and customized some of the most advance and creative aquariums, ponds and water features in the region.

Our vision has always been to deliver a full set of offering to our clients from design and customizing aquariums (Fresh water and Salt water), waterfalls, fountains, ponds, landscapes and both natural and artificial rock works. We have created a one stop environment for our customers where you can create your own dreams with help of the most experienced and creative in-house designers and engineers. Water Wonders goal is to create and build high quality and long lasting artistic aquariums and ponds using the latest aquatic technologies.

We are one of the few companies worldwide that meets and manufactures all our needs in-house. Manufacturing and engineering metal structures, piping, electrical circuits, water proofing, lighting, filtration systems , and glass and acrylic works for all our aquariums and ponds are some of our the in-house engineering capabilities. More over the dedicated wood work team is providing variety of designs and finishing for our products using some of the best materials available in market.

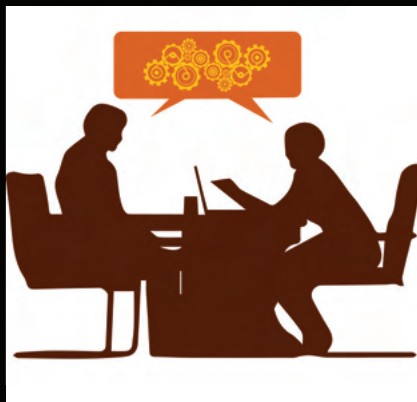

In this region, Water Wonders is considered as the only company that is able to offer its clients the same level of services and products that are available worldwide.

Offering reliable, safe and durable products and services is always at the core of our principle and making sure that our customers are enjoying their dreams without any hassle is our priority.

Water Wonders offers its products with industry accepted warranty terms and variety of after sales packages.

LIVE SEAFOOD TANKS

Seafood restaurants require tanks to contain a variety of seafood. WW custom manufacture seafood tanks for restaurants. We provide solid stands and beautifully-crafted cabinets designed to blend with the restaurants' interior decor.

Our aquarium workmanship and tank quality are what attracted restaurants to use WW tanks.

AQUAPONICS & HYDROPONICS

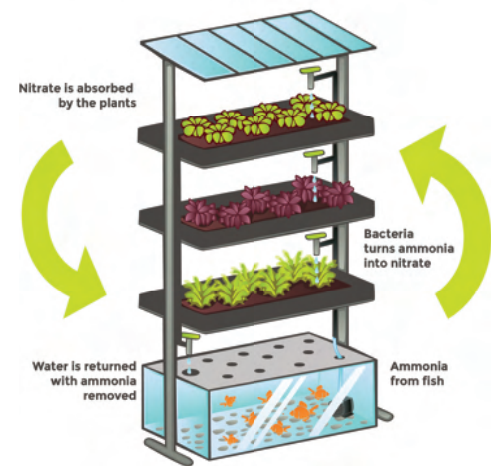

Aquaponics is a method by which you grow plants (Flower, Herb, and Vegetable) and nurture aquatic animals together in a system that recirculates the nutrients produced, to the benefit of both plants and animals.

At Water Wonders we believe being an industry leader is vital and it will help us provide our customers with the latest products and concepts. We are proudly considering ourselves as the pioneer of introducing Aquaponics into our indoor areas such as living room, offices, lobbies, restaurants and...

9.	Solid wood structure for cabinet
10.	Free high pressure PVC piping
11.	Free delivery – Dubai & Sharjah premises

CAST ACRYLIC SHEET

Acrylic is a transparent plastic that have gained widespread use because of it's ability to replace the glass. In everyday products it is particularly used for Aquariums, Swimming Pool Panels, sales displays, roof windows and also for demanding constructions such as windows in submarines.

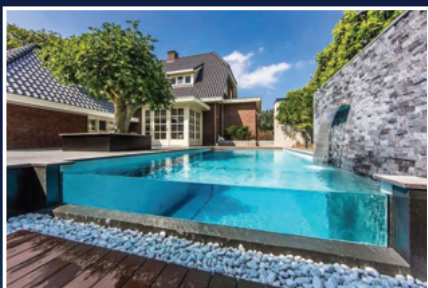

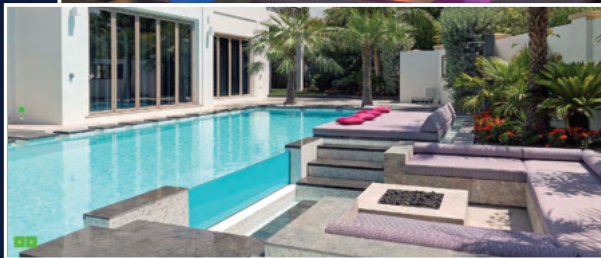

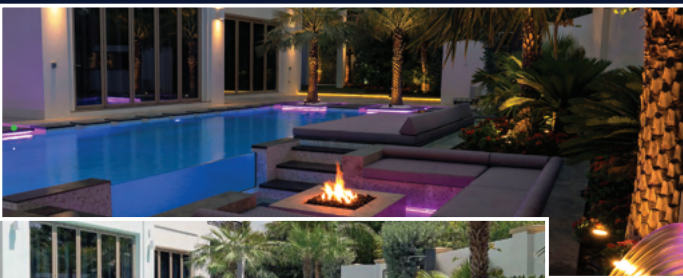

SWIMMING POOL CLEAR PANEL

At Water Wonders we can help you modernize and differentiate your pool and it's appearance by adding clear glass/ acrylic viewing panels. You can also add a view wall when the pool is attached to your house, and in the case of elevated pools, you can even view them from below. Panels can also be added between the pool and the Jacuzzi as an infinity edge from which water flows over.

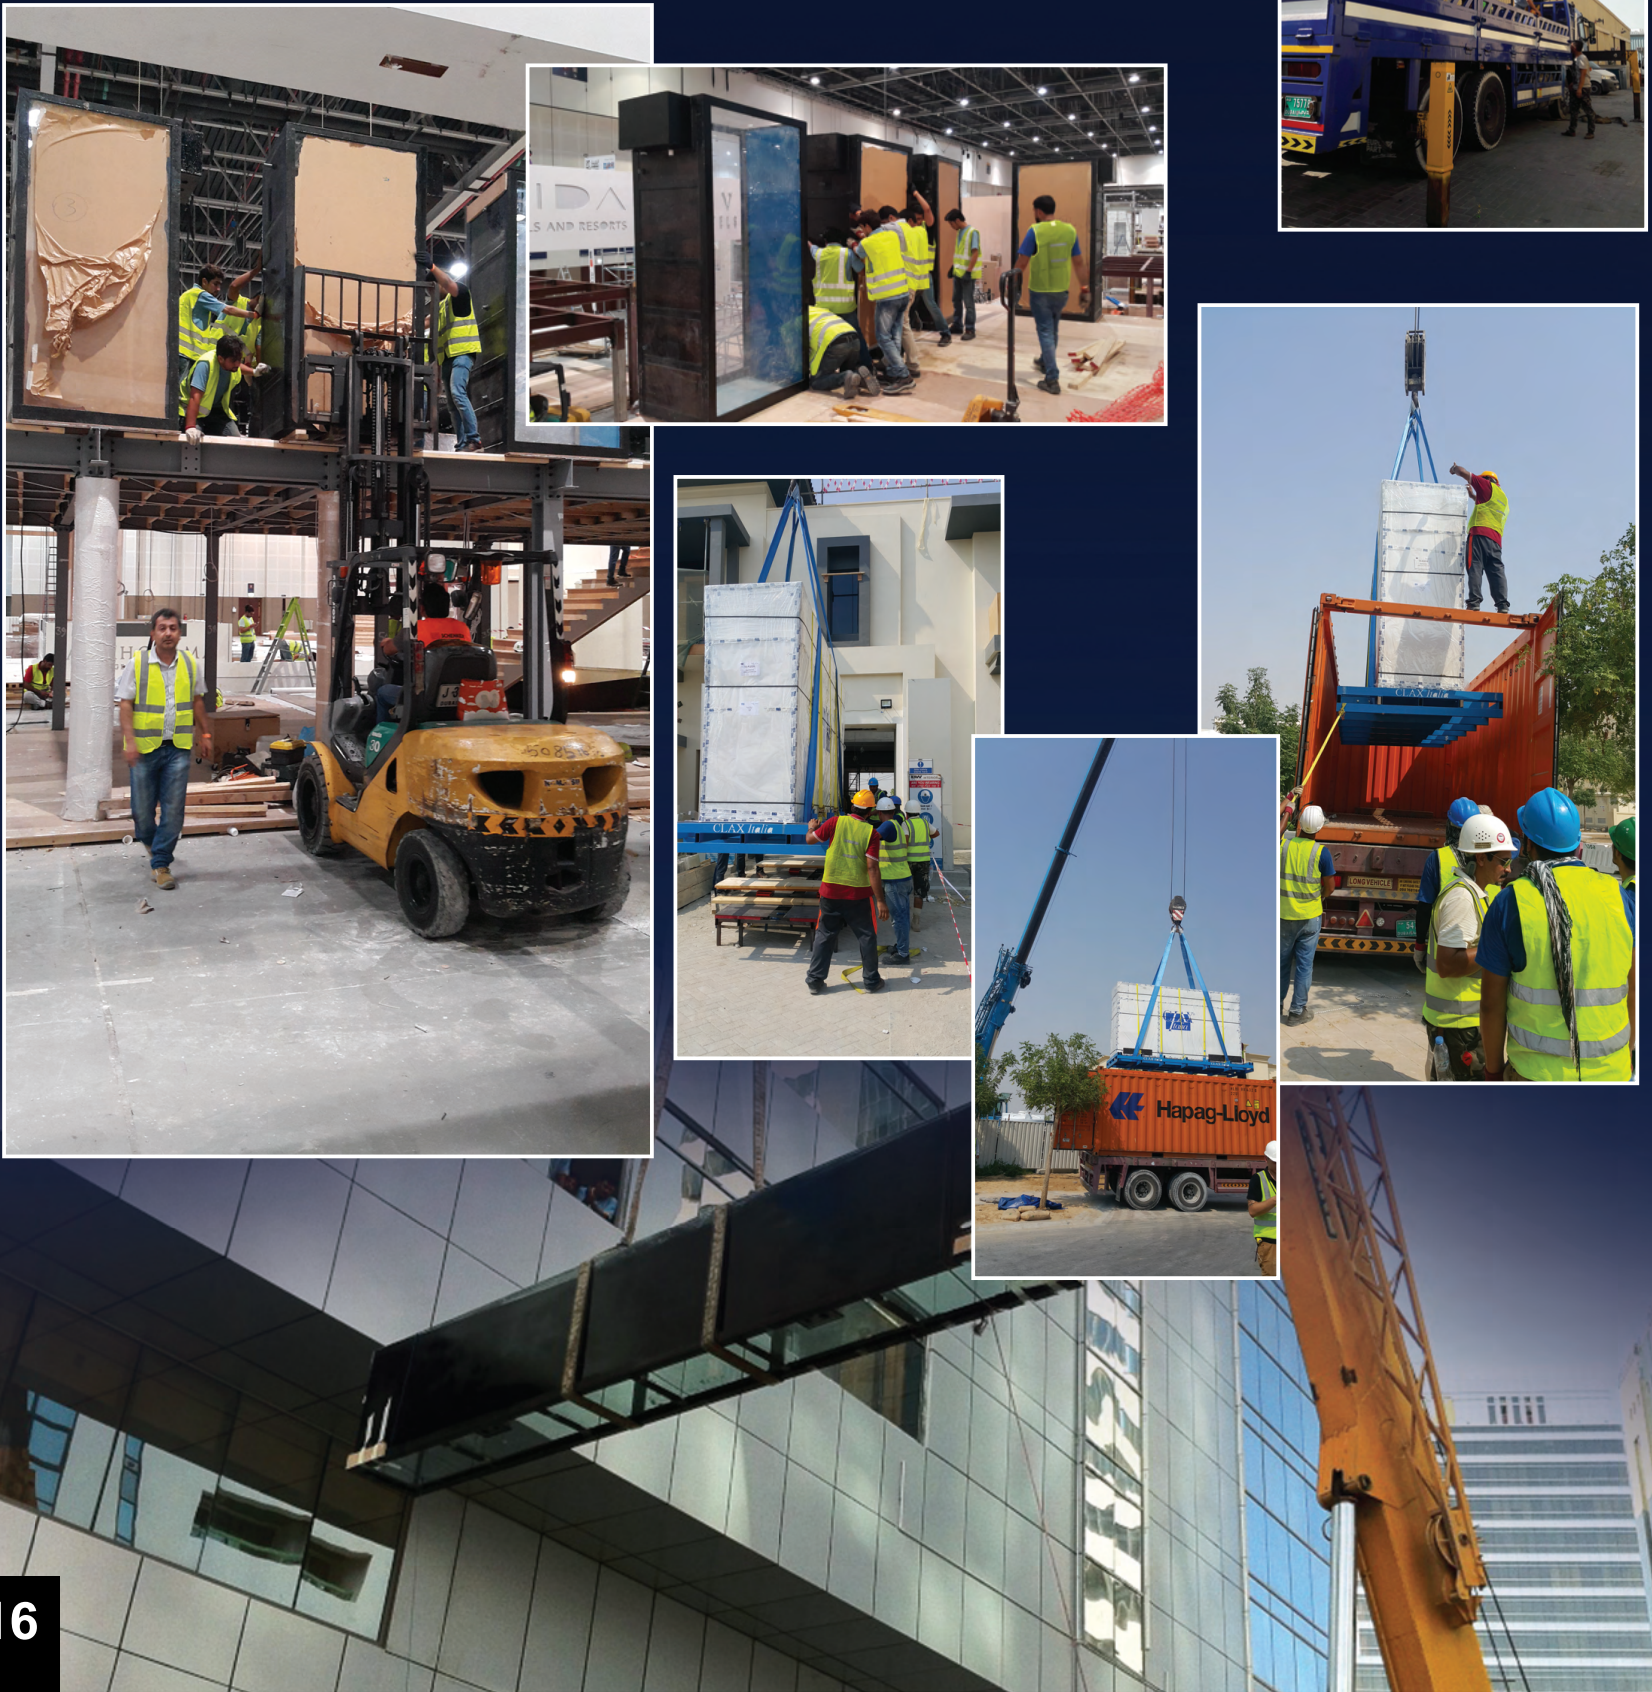

Whether the view is from a floor below, a radius spa or restaurant window, or an infinity edge wall, these viewing panels will take your pool's appearance to the next level. All the viewing panels are designed and engineered with both safety and style in mind, something that our customers have come to expect from us.

MOVING HEAVY AQUARIUMS

Transportation and delivery of aquarium requires vast expertise and should be performed by professional team using special tools. If done by unprofessional people, it can cause a catastrophe. We highly discourage the customers to perform or ask any third party personnel/company to move aquariums.

FAKE ROCK

Home-owners willing to hide ugly well, septic, or utility boxes or a commercial property owner with a series of irrigation valves needing protection, we have the right fake rock covers for the job.

What Makes These Fake Rocks Your Best Choice?

1. Made in U.A.E using patented "Real-Rock" moulding technology.
2. Available in Different natural colours.
3. Lightweight and easy to use.
4. Ultra-durable construction for years of zero maintenance use.
5. Texturing & colorant is moulded into the exterior walls, not sprayed or painted on.
6. Never any chipping or flaking and totally string trimmer proof.
7. Strong enough to stand or sit on – polyethylene material is extremely damage resistant.
8. Sized for success – each model can cover a variety of lawn and garden utilities.
9. Safe, non-toxic and made of GRP material. No sharp corners or edges to worry about.
