OUR APPROACH

Creative aquatic design, *combined with engineering expertise.*

Water Wonders creates exceptional water environments for residential, hospitality and commercial spaces — providing complete aquatic solutions covering design, engineering, fabrication, installation and maintenance.

Established in Dubai in 2001, building on a background in the aquatic field that began a decade earlier, Water Wonders has created and customised some of the most advanced and creative aquariums, ponds and water features in the region.

Our vision has always been to deliver a full set of offerings — from designing and customising freshwater and saltwater aquariums, to waterfalls, fountains, ponds, landscapes and both natural and artificial rockwork. We have created a one-stop environment where clients can realise their ideas with the help of experienced, creative in-house designers and engineers.

Offering reliable, safe and durable products and services is at the core of our principles. Our products are offered with industry-accepted warranty terms and a variety of after-sales packages.

2001 ESTABLISHED IN DUBAI	30+ YEARS OF AQUATIC EXPERIENCE	In-house DESIGN, ENGINEERING & FABRICATION	UAE DUBAI & OTHER EMIRATES
------------------------------	---------------------------------------	--	----------------------------------

ENVIRONMENTS WE CREATE FOR

Private villas & residences	Hotels & hospitality	Restaurants
Offices & corporate lobbies	Commercial developments	Exhibitions & showrooms

A ONE-STOP ENVIRONMENT

One team, from the first sketch to the
final drop of water.

i.

Experience

More than 30 years of experience in the aquatic field, applied to every aquarium, pond and water feature we deliver.

ii.

Trusted consultation

A trustworthy consultant for the right selection. We are not just selling – we are consulting.

iii.

Guaranteed delivery

Guaranteed delivery of your project, supported by industry-accepted warranty terms and after-sales packages.

ENGINEERING EXPERTISE

Engineering *behind the beauty.*

Exceptional aquatic environments require more than visual design. Every Water Wonders project is supported by technical planning, engineering and specialist installation.

01

Structural Engineering

Project-specific structural planning, support and technical considerations for aquatic installations.

02

Filtration & Life Support

Mechanical, biological and specialised filtration systems designed around each aquatic environment.

03

Waterproofing & Plumbing

Integrated hydraulic systems developed for reliable long-term aquatic performance.

04

Fabrication & Installation

Specialist fabrication and professional installation from concept through project completion.

IN-HOUSE CAPABILITIES

· Metal structures	· Filtration systems
· Piping	· Glass & acrylic works
· Electrical circuits	· Fibreglass works
· Waterproofing	· Aquascaping
· Lighting	· Woodwork & finishing

“We are one of the few companies worldwide that meets and manufactures all our needs in-house.”

A dedicated woodwork team provides a variety of designs and finishes for our products, using some of the best materials available in the market.

FROM CONCEPT TO COMPLETION

Understanding your vision *is* *our job.*

The most vital and efficient step towards owning an aquarium is seeking the right consultation. Every project follows one continuous path — managed by the same in-house team.

01	Consultation	We listen first. Understanding the space, the intended use and the client's ambitions shapes the right selection of system, species, materials and scale.
02	Design	Every system is developed around its environment — dimensions, materials, finishes, lighting and aquascape designed to complement the surrounding architecture.
03	Engineering	Structural support, filtration and life support, plumbing, waterproofing, electrical circuits and access for maintenance are planned for long-term performance.
04	Fabrication	Metal structures, glass and acrylic, fibreglass, piping and bespoke woodwork are manufactured by our in-house teams.
05	Delivery & Installation	Specialist handling and professional installation — including the transport and relocation of large, heavy aquariums with dedicated equipment.
06	Care & Maintenance	Professional ongoing care for aquariums, ponds, waterfalls and aquatic systems, backed by industry-accepted warranty terms and a variety of after-sales packages.

OI

FRESHWATER · MARINE · REEF

Custom Aquariums

Bespoke aquariums engineered for luxury interiors — designed around your space.

“A custom aquarium can be more than a display — it can become an architectural feature that defines an interior.”

DESIGNED AROUND YOUR SPACE

Water Wonders designs and builds bespoke freshwater, marine and reef aquariums for villas, hotels, restaurants, offices and commercial spaces across the UAE.

Every system is developed around its environment — from aquarium dimensions and materials to structural support, filtration, lighting, aquascaping and access for maintenance.

Our goal is to create and build high-quality, long-lasting, artistic aquariums using the latest aquatic technologies — with metal structures, piping, electrical circuits, waterproofing, lighting, filtration, glass and acrylic, fibreglass and aquascaping all engineered in-house, and cabinetry finished by our dedicated woodwork team.

FORMATS WE DESIGN & BUILD

- | | |
|----------|--|
| <i>a</i> | Built-in & wall-inset aquariums |
| <i>b</i> | Room-divider & see-through aquariums |
| <i>c</i> | Cylindrical & column aquariums |
| <i>d</i> | Walk-over floor aquariums |
| <i>e</i> | Coffee-table aquariums |
| <i>f</i> | Staircase-integrated aquariums |
| <i>g</i> | Restaurant & hospitality displays |
| <i>h</i> | Touch aquariums & kids aquarium design |

Freshwater

Planted and biotope aquariums with natural or artificial plants, rocks and driftwood.

Marine

Saltwater aquariums with live or artificial rock and coral compositions.

Reef

Live coral systems supported by dedicated filtration, lighting and life support.

02

UNDERWATER LANDSCAPES

Aquascaping

Plants, rock, driftwood and coral composed into immersive underwater landscapes.

AQUASCAPING

CREATING UNDERWATER LANDSCAPES

How the interior of your aquarium looks is *a design decision of its own.*

Aquascaping transforms an aquarium into an immersive underwater landscape. Our creative approach combines carefully selected plants, rocks, driftwood, coral and decorative elements to create environments that complement both aquatic life and the surrounding architecture.

Working with our creative team, you decide how the interior of your aquarium should look. Our experienced team creates different types of environments using different materials and elements – live or artificial coral, natural or artificial plants, rocks and driftwood.

ELEMENTS

LIVE CORAL

ARTIFICIAL CORAL

NATURAL PLANTS

ARTIFICIAL PLANTS

ROCK

DRIFTWOOD

SAND

AQUASCAPE RANGE

- 01 Artificial live rock
- 02 Artificial rock for freshwater aquariums
- 03 Live coral aquariums
- 04 Planted tanks
- 05 Sandfall in aquarium
- 06 Kids aquarium design
- 07 Touch aquariums

MARINE AQUASCAPING

Coral and rock compositions for saltwater and reef systems.

Live coral, or artificial coral and artificial live rock for lasting colour with simpler care.

FRESHWATER AQUASCAPING

Planted landscapes of stone, wood and living green.

Planted tanks and rockscapes, from natural layouts to themed designs for children.

03

INDOOR · OUTDOOR

Koi Ponds

Bespoke ponds inspired by nature — engineered for water quality and long-term performance.

BESPOKE KOI PONDS

The calm of a natural lake, *designed for your home.*

If you have ever gazed at a lake or a natural pond and couldn't look away, our creative team can bring you the same feeling with a fish pond for your indoor or outdoor environment.

Water Wonders designs and constructs koi ponds that combine natural beauty with engineered water management. Each pond is developed around its landscape, architecture and intended use, with careful attention to circulation, filtration, waterproofing, water quality and fish health.

Our expertise allows us to offer many options for the materials used to create your pond, while our engineering team takes care of all technical aspects – filtration, waterproofing and maintenance.

ENGINEERED FOR

· Circulation	· Water quality
· Filtration	· Fish health
· Waterproofing	· Maintenance

Indoor ponds

Atriums, courtyards and interiors.

Outdoor ponds

Gardens and landscaped villas.

04

MOVEMENT · SOUND · REFLECTION · LIGHT

Water Features

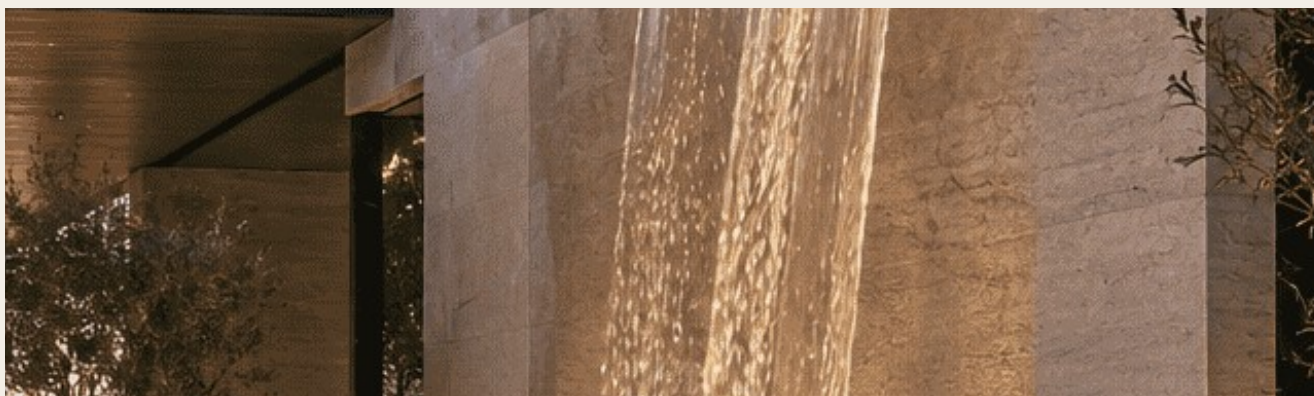

Bespoke fountains, waterfalls and architectural water installations.

WATER AS AN ARCHITECTURAL ELEMENT

The most relaxing part of *any space*.

Water features transform the atmosphere of a space through movement, sound, reflection and light. Our creative and engineering teams design and build features that complement villas, hospitality spaces, commercial developments, offices and landscaped environments.

We have been designing and implementing a variety of water features for well-known hotels, restaurants and residences in the region.

01

Glass Waterfall

Water flowing down a clear glass panel – freestanding, framed or built into reception and lobby walls.

02

String Waterfall

Fine vertical strings of falling water, used in stairwells, atriums and exhibition architecture.

03

Bubble Wall

Illuminated columns of rising bubbles in colour-changing light for lounges, restaurants and retail.

04

Bubble Waterfall

Rising air and falling water combined into a single feature panel.

05

Waterfall & Green Wall

Cascading water paired with living vertical planting.

06

Natural Design Waterfall

Rock-sculpted cascades inspired by natural landscapes.

07

Water on Pebbles

Low, quiet features where water spills over natural stone.

08

Fountains

Classic and contemporary fountains for courtyards, gardens and entrances.

09

GRC Water Features

Sculpted rockwork waterfalls and walls in GRC material, indoor and outdoor.

05
ACRYLIC · GLASS

Clear Pool Panels

Transparency engineered for aquatic spaces — where water becomes part of the architecture.

MODERNISE & DIFFERENTIATE YOUR POOL

Viewing panels that take a pool *to the next level.*

Clear glass and acrylic viewing panels change the way a pool is experienced. Add a view wall where the pool meets your house; in elevated pools, view the water from below; or set a panel between pool and jacuzzi as an infinity edge over which water flows.

All viewing panels are designed and engineered with both safety and style in mind — combining visual clarity with structural engineering and professional installation.

APPLICATIONS

- 01 View walls where the pool adjoins the house
- 02 Elevated pools viewed from below
- 03 Views from a floor below
- 04 Pool-to-jacuzzi infinity-edge panels
- 05 Radius spa windows
- 06 Restaurant viewing windows

Designed and engineered with both safety and style in mind — something our clients have come to expect.

MATERIAL

Cast *Acrylic.*

Acrylic is a transparent material that has gained widespread use because of its ability to replace glass — from aquariums and pool panels to demanding constructions such as submarine windows.

Water Wonders works with high-clarity cast acrylic for specialised aquarium structures and transparent swimming-pool applications, combining visual clarity with structural engineering and professional installation.

Large-format acrylic works are handled from fabrication through to on-site installation by our specialist team.

- HIGH CLARITY

SCULPTED LANDSCAPES

Artificial Rock

Lightweight, durable rockwork for aquatic and outdoor environments.

THE CHARACTER OF NATURAL STONE

Natural in appearance, *controlled in every detail.*

Artificial rockwork provides the visual character of natural stone while allowing greater control over shape, weight, placement and integration. Water Wonders creates lightweight artificial rock environments for aquariums, ponds, waterfalls, landscape installations and themed aquatic spaces.

For homeowners who want to hide wells, septic or utility boxes – or commercial property owners with irrigation valves needing protection – our fake rock covers are the right solution.

PRODUCT FAMILIES

Utility cover rocks	Conceal wells, septic tanks, utility boxes and irrigation valves.
Planter rocks	Rock forms with planting pockets for gardens and entrances.
Address rocks	House numbers set into natural-looking stone.
Rocky walls	Textured stone and pebble wall panels.
Rocky water features	Cascades and fountains in sculpted rock.

WHAT MAKES OUR FAKE ROCK COVERS THE RIGHT CHOICE

- | | | | |
|----|--|----|---|
| 01 | Made in the U.A.E. using patented "Real-Rock" moulding technology. | 06 | Never any chipping or flaking, and totally string-trimmer proof. |
| 02 | Available in different natural colours. | 07 | Strong enough to stand or sit on – the polyethylene material is extremely damage-resistant. |
| 03 | Lightweight and easy to use. | 08 | Sized for success – each model can cover a variety of lawn and garden utilities. |
| 04 | Ultra-durable construction for years of zero-maintenance use. | 09 | Safe, non-toxic and made of GRP material, with no sharp corners or edges. |
| 05 | Texturing and colourant are moulded into the exterior walls – not sprayed or painted on. | | |

07

SUSTAINABLE · CLOSED-LOOP

Aquaponics & Hydroponics

Grow your own organic food from your fish tank.

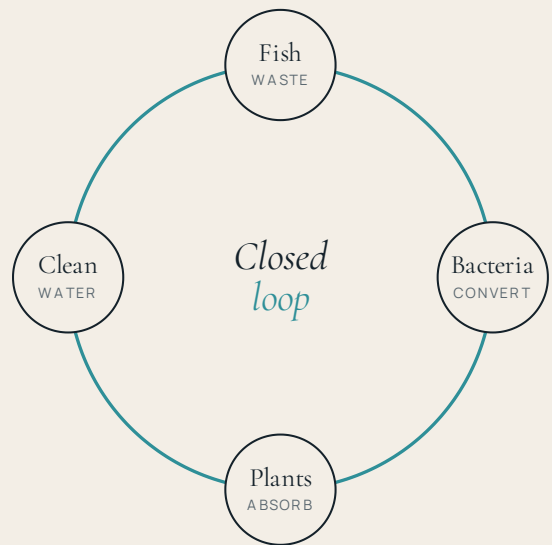

SUSTAINABLE AQUATIC GROWING SYSTEMS

Fish and plants, *working together.*

Aquaponics is a method of growing plants — flowers, herbs and vegetables — while nurturing aquatic animals in one system that recirculates the nutrients produced, to the benefit of both.

Water Wonders designs closed-loop systems that bring aquaculture and hydroponic growing together in a connected water cycle, creating efficient and visually engaging environments for modern UAE settings.

We are proud to consider ourselves pioneers in introducing aquaponics into indoor spaces such as living rooms, offices, lobbies and restaurants.

Waste from the fish is converted into nutrients, absorbed by the plants, and clean water returns to the tank.

SPECIALISED AQUATIC SYSTEMS

Beyond the *expected.*

Beyond core aquatic environments, Water Wonders provides specialist systems and services for unique project requirements.

08_a

HOSPITALITY

Live Seafood Tanks

Seafood restaurants require tanks to hold a variety of live seafood. Water Wonders custom-manufactures purpose-built aquatic systems for restaurants, hospitality and seafood displays.

We provide solid stands and beautifully crafted cabinets designed to blend with the restaurant's interior décor.

“Our aquarium workmanship and tank quality are what attract restaurants to Water Wonders tanks.”

08_b

LOGISTICS

Heavy Aquarium Moving

Specialist handling and relocation for large and complex aquarium installations. Transportation and delivery of an aquarium require vast expertise and should be performed by a professional team using special tools.

IMPORTANT ADVICE

If done by unqualified people, moving an aquarium can cause a catastrophe. We strongly discourage clients from moving aquariums themselves or asking any third-party personnel or company to do so.

SPECIALIST SOLUTIONS AT A GLANCE

Live Seafood Tanks

Purpose-built aquatic systems for restaurants, hospitality and seafood displays.

Standard Aquariums

Professionally engineered aquarium systems for practical installations. [p. 23](#)

Heavy Aquarium Moving

Specialist handling and relocation for large, complex installations.

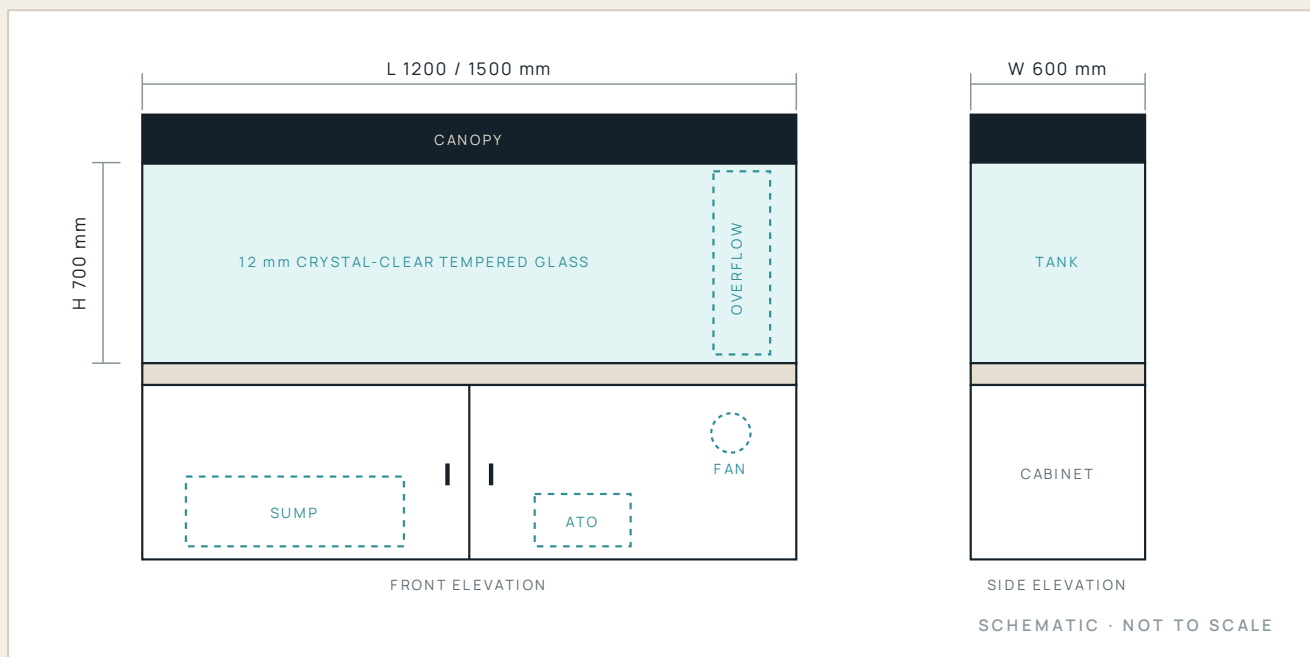

Cast Acrylic

High-clarity acrylic materials for specialised aquatic applications. [p. 17](#)

PRODUCT · IDEAL FOR FRESHWATER & SALTWATER

WW-Standard Aquarium

Aquatic adventures should be achieved with no financial hassle — which is why we offer standard-dimension aquariums and bases, built to the same standard and quality our clients have come to know and expect.

MODELS

WW-0120

Tank L1200 × W 600 × H 700 mm
12 mm crystal-clear, polished & tempered glass

WW-0150

Tank L1500 × W 600 × H 700 mm
12 mm crystal-clear, polished & tempered glass

INCLUDED

Free delivery within Dubai & Sharjah premises.

SPECIFICATION

- 01 Silent overflow design
- 02 Special painting for rear glass
- 03 Professional sump system
- 04 Auto top-up tank + floating valve
- 05 18 mm thick plywood fixed beneath the glass tank for more sustainability and reliability
- 06 3-side cladding in laminated moisture-resistant MDF + top canopy with Corian marble borders
- 07 Ventilation fan for cabinet
- 08 Automatic light for cabinet
- 09 Solid wood structure for cabinet
- 10 Free high-pressure PVC piping
- 11 Free delivery — Dubai & Sharjah premises

ALSO FROM WATER WONDERS

Living landscapes, *and the care that keeps them.*

10a

Terrariums

Custom indoor living landscapes designed for residential and commercial spaces.

10b

Green Walls

Living vertical landscapes with integrated irrigation and selected plants.

10c

Aquarium & Pond Maintenance

Professional maintenance and ongoing care for aquariums, ponds, waterfalls and aquatic systems.

“Making sure our clients enjoy their aquatic environments without any hassle is our priority.”

Every installation can be supported by a variety of after-sales packages, with products offered under industry-accepted warranty terms.

WHY WATER WONDERS

Experience meets *engineering.*

01

Since 2001

More than two decades of experience in aquatic design and engineering.

02

In-House Expertise

Design, engineering, fabrication and technical systems managed by our experienced team.

03

Complete Delivery

From concept and engineering through installation and ongoing maintenance.

04

UAE Expertise

Solutions developed around local architecture, climate and project requirements.

FREQUENTLY ASKED

What services does Water Wonders offer?

Custom aquariums, aquascaping, koi ponds, aquaponics and hydroponics, acrylic and clear pool structures, architectural water features, artificial rockwork and specialised aquatic systems – plus terrariums, green walls and maintenance.

Does Water Wonders design custom aquariums in Dubai?

Yes. We design and install bespoke freshwater, marine and reef aquariums for residential, hospitality and commercial projects.

Do you build koi ponds?

Yes. We design and construct indoor and outdoor koi ponds with specialised filtration, waterproofing and circulation systems.

Do you install clear swimming pool panels?

Yes. We provide engineered acrylic and glass clear panel solutions for swimming pools and architectural aquatic applications.

Do you provide aquarium and pond maintenance?

Yes. We provide professional maintenance and ongoing care for aquariums, ponds, waterfalls and aquatic systems.

Do you work outside Dubai?

We provide aquatic solutions across Dubai and other Emirates, depending on project requirements.

START A PROJECT

Let's create something *exceptional.*

From a statement aquarium and bespoke koi pond to an architectural water feature, clear pool panel or living green installation, Water Wonders can help transform your concept into a professionally engineered reality.
